

Construction Improved Through Technology
BUILDING SYSTEMS NETWORK

MODULAR homes can be **GREEN** too! For many years now, the construction methods used by Professional Building Systems of NC, have favored **GREEN** Building. In fact, Professional Building Systems built one of the first certified Healthy Built Modular Homes in Asheville, NC back in 2006.

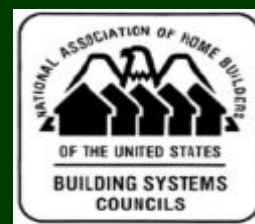

Professional Building Systems of NC, with experienced local builders work closely together to build your home to achieve **GREEN** certification. It all begins in the factory, where streamlined construction methods and perfect building conditions minimize waste, protect building materials from the elements, and increase overall construction efficiency.

Professional Building Systems of NC offers a wide range of **GREEN** building products including recycled and sustainable materials and also well known products such as Hardie Plank.

Thinking of building Green? Not only can you benefit from the speedy construction, consistent quality, energy efficiency and lower construction costs, that are all benefits of building with Professional Building Systems of NC, your modular home can be **GREEN** too!
